Hello Mr. Neutra. I recently photographed a few homes on Oak Park Dr. (I think that's the correct street name). They are located off of Beverly Glen, on the valley side of the hill, close to Sherman Oaks and Studio City. They are severely cantilevered. I was told by an owner that the 12 homes on that street are all originally Neutra homes. I have not been able to verify this or not. Can you tell me what you know about Neutra's involvement with these structures if any?

1/10/05 We originally designed these, but disavowed them when announced construction deficiencies were not addressed.

DO NOT CALL THESE NEUTRA PROJECTS! [They have since been bastardized by remodels anyway].

Dear Mr. Neutra. Thank you for clarifying. The 'bastardization' that you refer to (I think of it as architectural entropy) is precisely one of my interests in photographing these structures. You have been very helpful.
